And when I found out that the new torrent file has a slightly different title, I tried to use something like this: #!/bin/bash echo "["+basename(\$1) echo "] \$1" But without any luck. So I have no Idea how to get the full name of the.torrent file in this case. A: I use curl to get the file name from the hash name of the torrent: curl -s | head -n 1 Output: Cloud & Steam & VPS Workbench The Shell Key Container Q: Can I derive the constant term of the Taylor series from an integral? At the moment I have trouble proving this, but I could imagine it to be true. Let \$f(x)\$ be a positive real-valued integrable function on \$(0,\infty)\$ and \$a\geqslant0\$. Then for all \$x>a\$, we have that \$\$\sum_{i=0}^\infty \frac{f^{\circ i}(a)}{i!}(x-a)^i\$\$ can be extended to a continuous function on \$[a,\infty)\$. Is it possible to derive this simply by just integrating? I.e., is it possible to prove this by, for example, \$\$\sum_{i=0}^\infty \frac{f^{\circ i}(a)}{i!}(x-a)^i = \int_a^x \sum_{i=0}^{-1} (\infty) \frac{f^{\circ i}(1)}{i!}(x-t)^i\,dt,\$\$ and then extend to \$[a,\infty)\$ using the properties of the Riemann integral? (So, formally this only works for strictly positive integrable functions.) Thanks in advance. A: Well, I don't think so, but it's not really complicated. If \$g\$ is Riemann integrable on \$[a,b]\$, then \$f(x)=g
