About This Game

Save the world from being covered in excrement!

If you love dealing with everyday inconveniences, ridiculous situations, and having no toilet paper, then this game is for you. Tons of adventure and excitement in this 25 hour long quest. Explore the world, defeat enemies and solve puzzles!

We got a good amount of hate because (1. RPG Maker) and (2. Poop jokes). With that said:

Before you criticize, AT LEAST play the free 3 chapter demo!

Set out on a somewhat meaningless epic adventure! Four friends (well 2 are friends, 2 are randoms) with stereotypical elemental powers find out what it means to have their toilet paper stolen. They set out for revenge on a mysterious villain (OOOoooOOOooohhhh.....) who causes this immense inconvenience. Prepare yourself for a full day's worth of excitement (disclaimer: please don't play for a whole day in one sitting)!

Nothing special, just spin-off for Doom 3.. Horrible game. Cant even jump correctly. Very cute and not overly easy to win. With the various achievements its a fun little game at the price.. This is a complex wargame covering the Thirty years war in considerable detail, with particular attention to army organisation and command. As such I would suggest this game is more suited to persons with a genuine interest in the period rather than casual players. The subject is also something of a niche area which recieves much less attention than other major european conflicts perhaps because this was a particularly nasty conflict which devastated large parts of central Europe (religious wars always seem to bring out the worst in people).

The game itself is set in what is often referred to as the "musket and pike" era when firearms were starting to have a significant effect on the battlefield but owing to slow rates of fire, limited range (not to mention a tendency to become absolutely useless at the first sign of a rainshower) they were still not the principal infantry weapon with pike armed infantry still providing the final shock to break the opposing army.

The map is well done and the graphics decent enough although strictly functional - anyone expecting fancy animations will be dissapointed. The basic game engine is getting a bit long in the tooth now, although at least it will be comfortably familiar to players who have experience of other games in the series and it does a fairly good job of coping with the period in question. On the whole I would recommend this game to those with and interest in the period.. I don't even know whats going on. Why is he going up a pipe to deliver present? i bought for 10 cents so i guess.... If you like games like super hot then this is a must play.

I loved this game. How much? I'm actually writing a review about it. It's fun, wacky, Challenging, and has an interesting story line. I highly recommend this game to anyone who loves puzzle games and doesn't mind a story to boot.. Typically, I'm heavy support on heists. I use the muscle perk deck--It draws the cops fire from the crew to you--with a TechForcer build. Light Machine Guns are my weapons of choice. The RPK is good for when you go infamous. It is available from level one. The Brenner-21 is very accurate for an LMG. It does the most damage, but has the lowest rate of fire. It can be useful for picking off targets in the distance and at point blank. The KSP has a high rate of fire, high damage, high stability, and mid-range in accuracy (for an LMG, it sucks compared to a CAR-4). They are all useful for different heists. No matter which one I use, I can assure my team that they are safe and sound :). The controls are terrible on the keyboard and the only way I could pause the game to get to settings was by pressing shift and tab, when you use the mouse to shoot the direction that your bullets go changes randomly. even if it didn't do that it would still be hard to aim because if you put your mouse on the left of the screen and start firing, the bullets go below your mouse. I tried plugging in my Xbox 306 controller to see if it works, I could move around easily with the left wiggle stick, but the right one didn't do anything and Lt and Rt just shot bullets to the left and right.. In many ways, Far Cry Primal feels like Ubisoft had this perfectly good Far Cry setup from Far Cry 4 that was just sitting there and they decided to cobble together a quickie storyline in "10,000 BC" (intentional reference to the bad movie of the same name). While it does have some unique elements, you can see the similarities (elephants/mammoths, tigers/sabertooth tigers, etc.).

One thing I thought when I started playing was that I wouldn't like the prehistoric weaponry. I have to give Kudos to Ubisoft for making the gameplay/mechanics more interesting than I thought they would.

HOWEVER... I think they have done enough to make this a separate story. The storyline isn't very complicated, but, then again, are any of the Far Cry storylines complicated? There are the usual almost overwhelming number of side missions and pop-up events to keep you busy and able to purchase more advanced weaponry with your gained experience/leveling up.

While not overwhelmingly good, I think this was, overall, a worthwhile buy... on sale! I would not be nearly as happy if I had paid full retail. I believe I purchased this at 50% off.

Recommended.

Note: I do not like multiplayer games, so I stick with the Campaign side of games for my reviews.. didn't bother to finish V10

An FPS with no a single redeeming quality.

Weapons? Meh.

Sounds? Meh.

Controls? Clunky.

Gunplay? As basic as it gets.

Levels? Bottom of the barrel.
